Operators

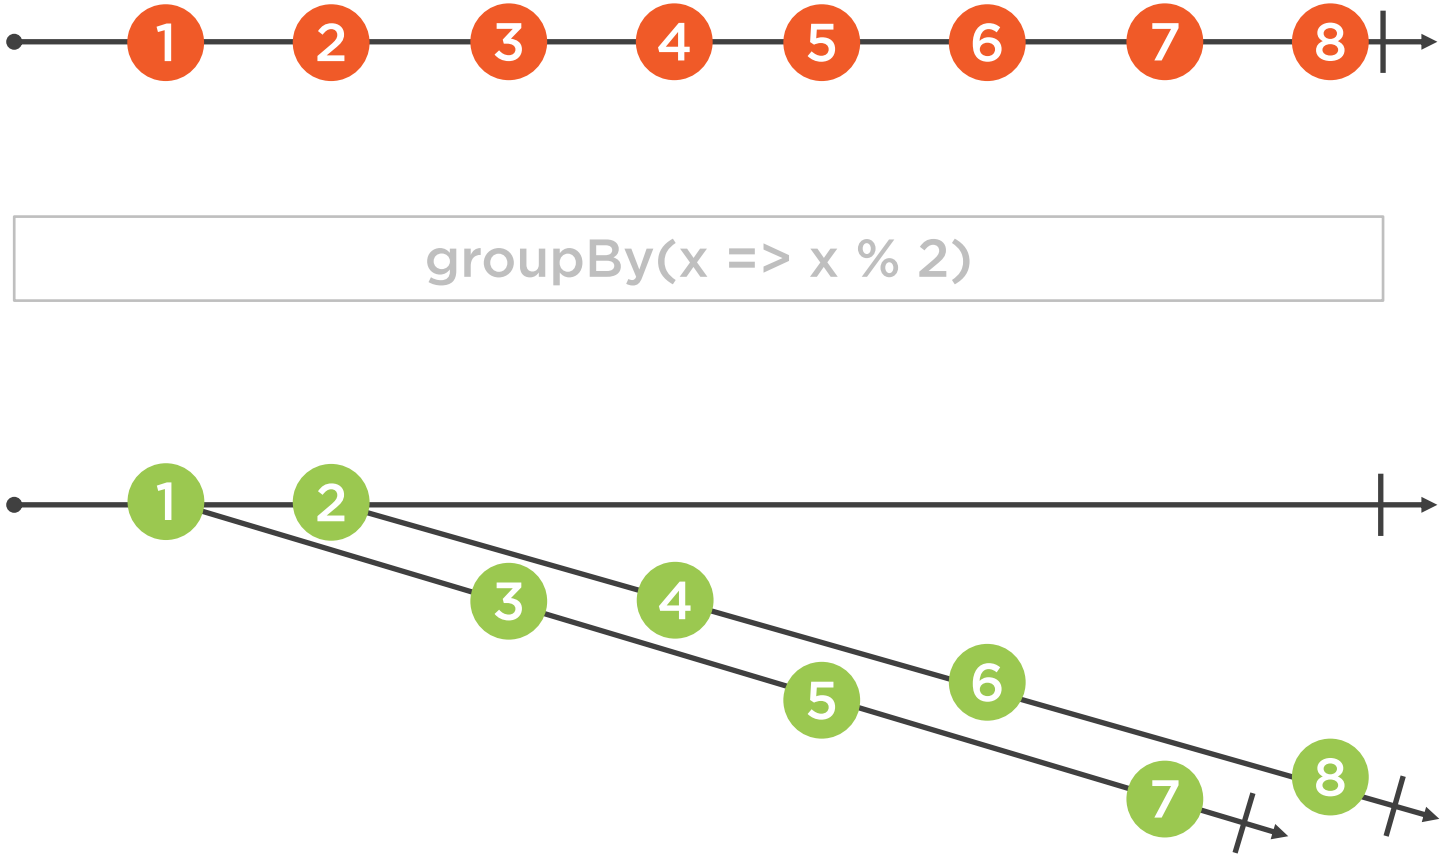
- groupBy
- pairwise
- partition

- switchAll
- toArray
- zipAll

groupBy

Organize values by criteria

Emit GroupedObservables



pairwise

Emit pairs

Value and previous value

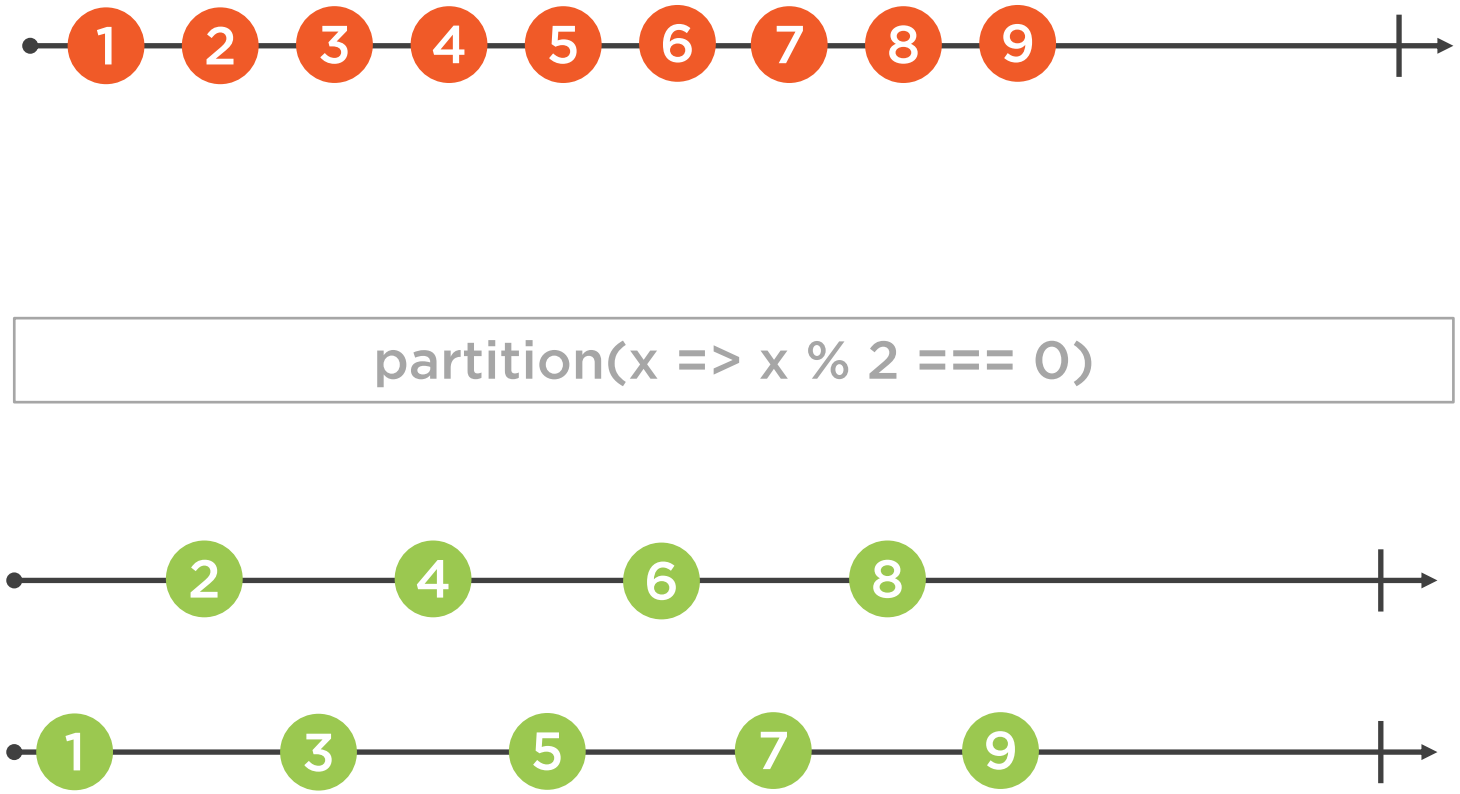
Starting with value 2

partition

Return 2 Observables:

Satisfy predicate

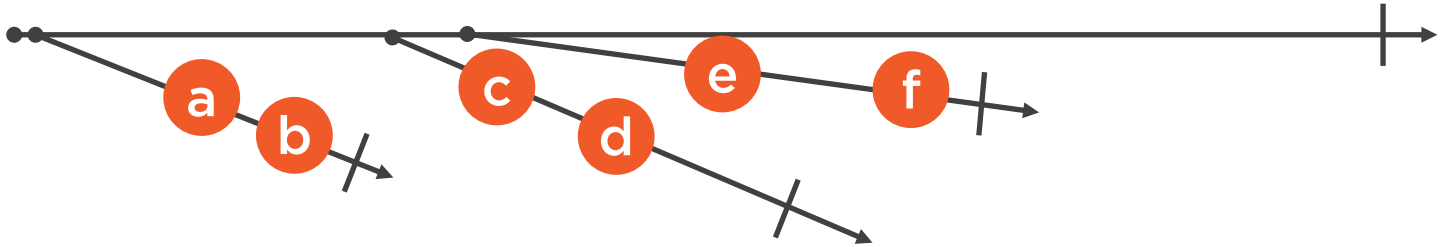
Don’t satisfy predicate



switchAll

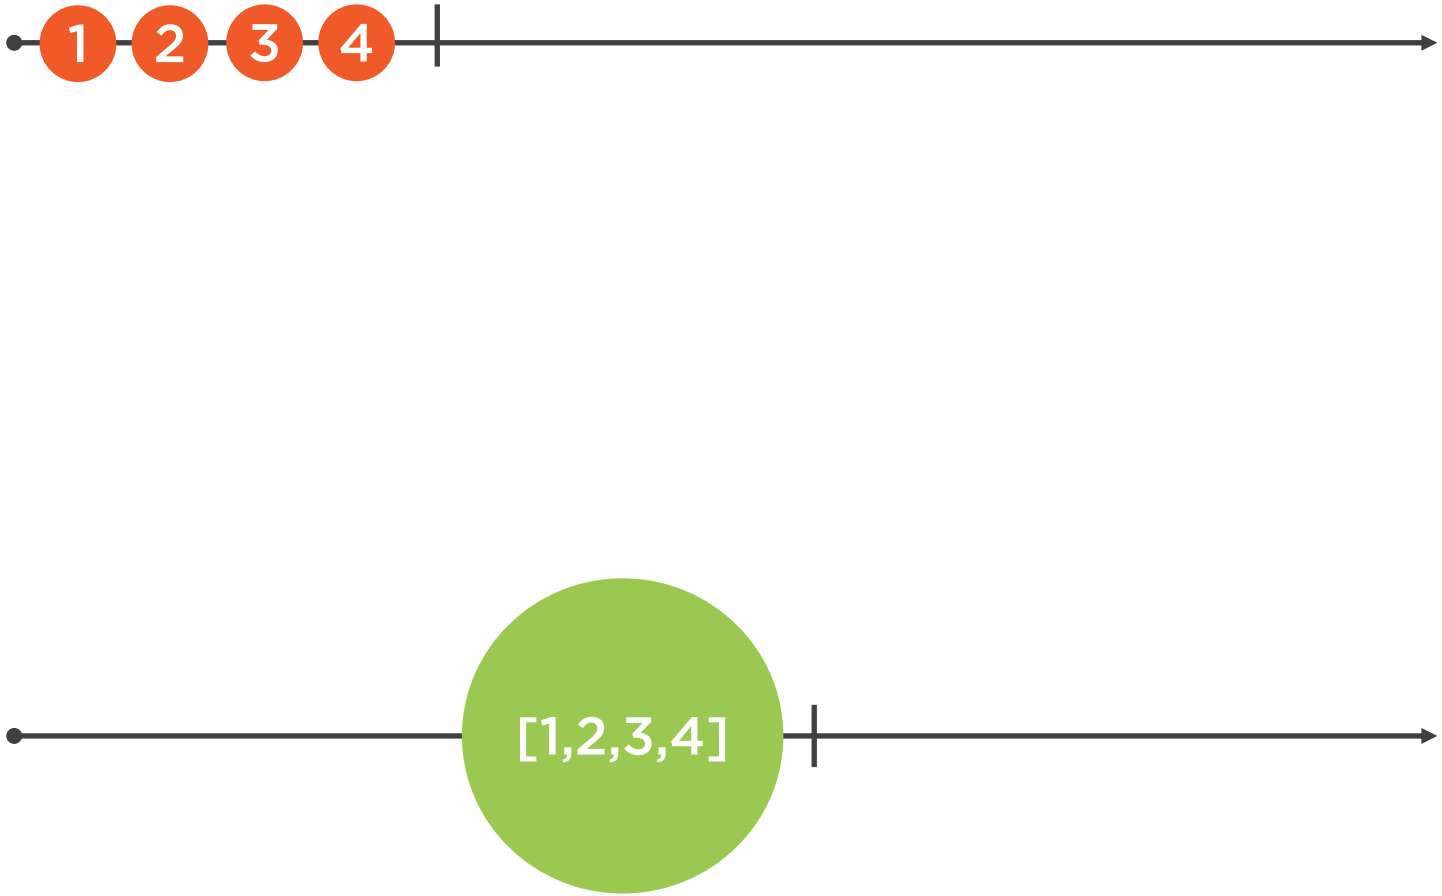
Emit if complete

Before next source emits

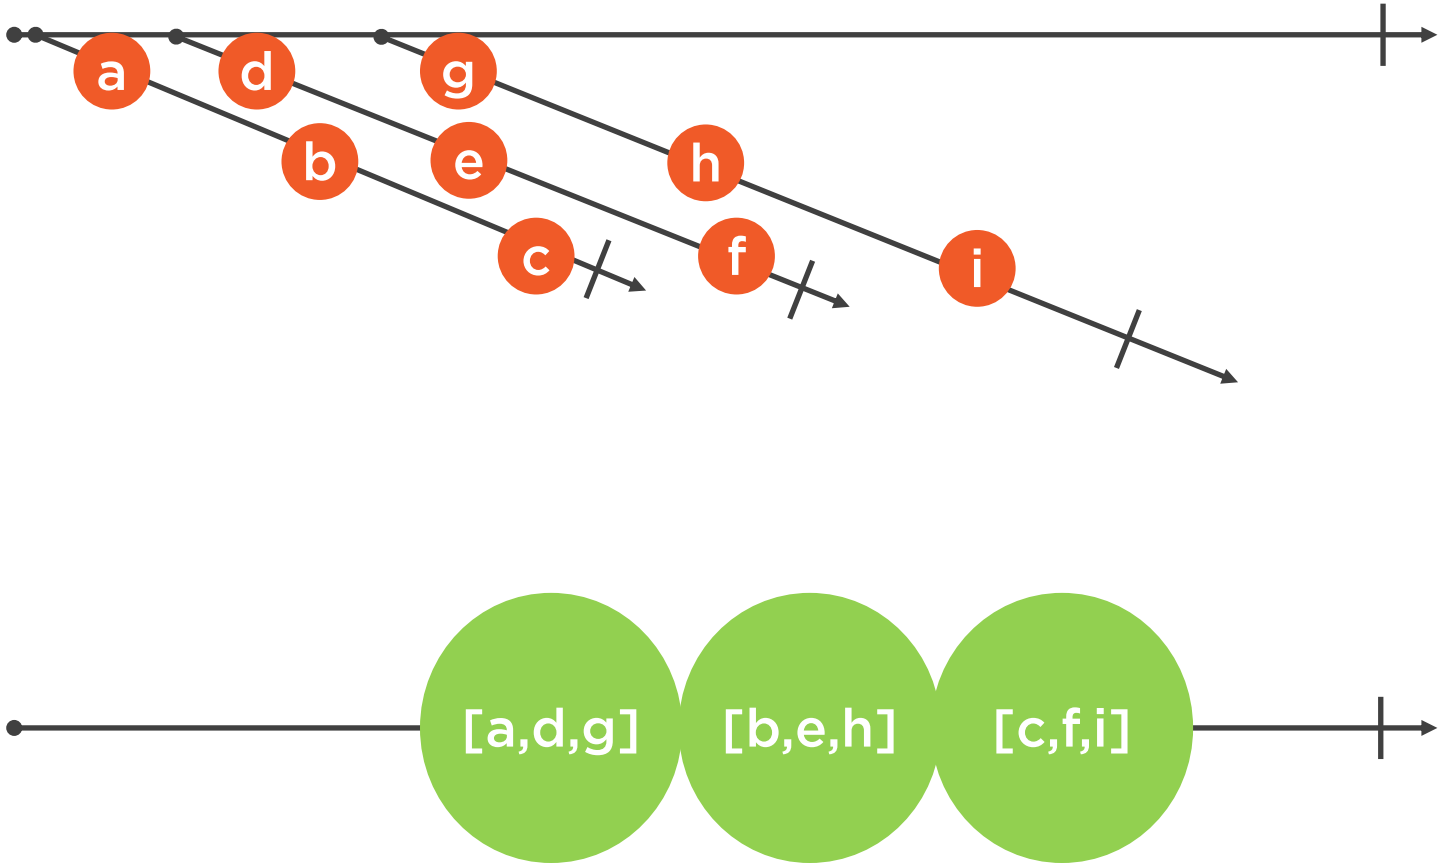


toArray

Emit values as one array



zipAll

Collect elements from sources


Emit as array of nth element value
